200 students ±

**AREA OF BUILDING**

15,000 ± sf new construction  
5,000 ± sf renovations

**REMARKS**

Columbus, Texas is a modern community brimming with huge oak trees and an old fashioned feel. At the heart of this city is the St. Anthony Catholic School Campus (SAS), an affiliation of the Diocese of Victoria.

Beginning with the project’s visioning, program and schematic design, JMB2 collaborated closely with the school/parish leaders and faculty to uncover the opportunities of designing a 21<sup>st</sup> Century Learning Facility, as it relates to their community. The school’s design seeks not only to incorporate learning truisms but also to weave the school architectural character and charm into the existing campus and community. The school has been organized into “pods” with common “break-out” spaces and flexible classroom organization. Specials offered include common community/school areas, robust art and science programs, and the campus centerpiece “the Learning Commons” with adjacent computer labs. SAS is truly a 21<sup>st</sup> century learning School reaching to the future.
